

Eliminate Potential Threats to Your Casino's Assets

GENESIS

Let Kobetron's Genesis Protect Your Gaming Operation 24/7

Whether you're brand new to the gaming industry or a seasoned veteran, having accurate information for your gaming floor is essential to maintaining a well-organized and highly profitable operation. Without clearly defined Standard Operating Procedures (SOP) or total control of your floor, you're setting yourself up for cheating, software fines, patron disputes or even worse, the erosion of your casino's credibility.

Kobetron and Gaming Laboratories International (GLI®) have entered into a joint partnership to ensure your gaming operation is not only compliant, but also secure. We want to provide you with the tools that will help you manage your business **effectively** and **efficiently**, saving time and money in the process. Genesis was designed with your operation's success in mind.

Take Control of Your Gaming Floor

What Is Genesis?

The Genesis package was designed to eliminate potential threats to your casino's assets. You will be provided with a specialized team of Subject Matter Experts (SME) who will create a custom verification and compliance framework that can be utilized for years to come. No more uncertainty and no more chaos. Create a new beginning today so you can have better peace of mind.

What Else Does Genesis Include?

You will also receive:

- Full Electronic Gaming Device (EGD) software audit
- Slot file inventory construction
- Communication testing
- Gaming system audit
- Kiosk testing
- One free year of IRIS Online™, Kobetron's award-winning compliance system
- One free Verify+ by Kobetron™ software license
